Mines and Prospects -- Furnaces and Mills

Optimistic Report On Homestake Mine

Year's Work Finished-Manager Estimates That Ore Valued at \$2,500,000 Is in Sight.

Salt Lake stockholders in the Home stake mine at Silver Peak, Nev., will be interested in the report of Manager Byron E. Shear, who has returned from an inspection of the properties. Manager Shear says, in part:

"I found that the annual labor for the year 1904 has been done on all the claims and the proper affidavit will be filed

and the proper atheavit will be cores.

"The Mohawk claim, covering the mouth of the Mohawk tunnel site, his been properly located. The Mohawk tunnel is in twenty feet and work upon it will soon be reaumed and continued until it cuts the vein about \$60 feet below the surface. Your property conslats of nin-mining claims, three mill sites, one place claim of 160 acros and a five-stamp mil in course of erection, and which will be running within the next thirty days.

Extent of the Claims.

Extent of the Claims.

"The claims cover about 350 linear fee of the apex of the famous Drinkwater am Homestake vein. The vein can be easily traced upon the surface, as it has been opened in about twenty places by tunnel and inclines varying in length from twen ty to 350 feet. All of these openings show the one in place, with well-donned walls of granite. The vein dips with the slop of the mountain toward the valley. This will enable the company to work the property by a series of tunnels to a depth of 356 feet from the highest point of the cutterop.

"The vein varies in thickness from few inches to thirty feet. The ore is quartz, carrying free gold and sulphide of lead and from

Method of Saving Values.

"About 60 per cent of the values is saved by amalgamation, 8 per cent by concentration and 25 per cent by concentration and 25 per cent by cyaniding, leaving 4 per cent in the final tallings. The ores yield readily to the above treatment in a properly-built mill.
"Your mill will have a crusher, five 1050-pound stimps, one Wildey concentrating table, one belt table, two canvas tables and cyanide tanks, etc.

Cost of Treating Ore.

"At present the ores are hauled to Silver Peak for treatment on account of difficulties of obtaining water. I estimate the cost of mining, milling and transportation at not to exceed its per ton. This will be reduced to \$1 per ton in the near future by building new and larger mills at the mouths of the tunnels and pumping water up to them.

Ore in Sight Worth \$2,500,000.

Ore in Sight Worth \$2,500,000.

"Sixteen general samples taken along a body of ore from two to eight feet thick at the foot of the Western Soldier incline show an average of \$45.18 per ton.

"During the year 1963 1143 tons were mined and milled, of an average value of \$10.25, from this tunnel. I feel perfectly safe in estimating the gross value of the ore in sight at \$2.50.00.

"By the list of January, 1965, we shall have in sight in three small workings, ready to break down and send to the mill, at least \$75.00 worth of ore, varying in average values from \$15 to \$45 per ton."

MILLS AT GOLDFIELD.

Several Projected and One Plant Nearing Completion.

The Goldfield district is assured a number of reduction plants within a very few months. Several important milling projects are being formulated, among them one that involves the erection of a mill to operated in connection with a dease that has just been granted to Messrs. Harrison, Atteaux and Lazard on the north 300 feet of the Red Top company's territory, says the Tortopah Miner. The mill will be of at least 200 tons daily capacity and will treat custom ore as well as the production from the operators' lease. The local water company is planning to further develop its water supply to the exten of an additional 100,000 gallons daily. This will be devoted mainly to milling purposes. Another company has been formed to build and operate a mill here. Men are now investigating several sources of supply and state they are assured an abundance of water for all purposes. The mill constructed by Maj. Gardner will be completed within a few weeks, and within a very short time there will be several hundred stamps dropping in the district.

The first mill and cyanide plant in Goldfield is now within sight of completion. The Combination company has had its mill foundations completed for some time and has been waiting for the arrival of the machinery. This has arrived at last and is being rapidly swung into place. The trench for the pipe line has been dug to the mine, and the four-inch pipe will be laid by the first of the year. Within a few weeks at most the people of Goldfield will hear the thud of the stamps and gold bricks instead of gold ore will soon be gonorth 300 feet of the Red Top company's

MANNING MILL CLOSES.

Season's Run Was Profitable-Sampling Mill Running Steadily.

The Manning mill of the Con. Mercuhas been closed down for the season and more charges are being hoisted into it. The final clean-up will be made about December 29, when the treatment of the charges now in the tanks will be finished.

Although started late in the season by the company, the run has been profitable.

The sampling mill is running satisfactorily.

TUNNEL NEARING COMPLETION.

In Two Weeks Connections With the Cactus Will Be Made.

Within two weeks the great Newhouse anel in Beaver county will be finished. year's work. The tunnel is run h the 600-foot level of the ough which the ores of the bugh which the ores of the bugh which the ores of the bugh of the conveyed to the reduction the ore strikes made in the tunion in a well-defined fissure vein of excellent quality, give proof of the ductiveness of the ground.

Tonopah-Goldfield Shipments. Tonopan-Goldfield Shipments.

The shipments over the Tonopan railroad this week aggregated 195 tons, of
which 25 tons came from Goldfield. The
shipments are divided as follows: From
Tonopan-Tonopan company, \$47 tons;
Belment, 125 tons; Montana-Tonopan, fifty-nine tens; Tonopan Extension, sixty
tons, From Goldfield-Combination, fiftyeight tons; Jumbo, sixty-three tons; Plorence, 165 tons, January, eighteen tons.
On account of the badly-congested condition of Tonopan and Goldfield freight
at Reno and Mound House, the Southern
Pacific company has announced that until the congestion is relieved it will recelly no freight for these two camps except goods and subsistence supplies. It cept goods and subsistence supplies. It is probable that under this order no heavy freight will be accepted for Tonopah and GoMfield before the first of January.

LIGHT TRADING ON MARKET.

Victoria Takes a Rise-Other Prices Were Stationary.

The market of vesterday fell off slight-The market of yesterday fell off slightly from that of the day before. The trading was light and several of the stocks showed a tendency to retrograde in price. May Day was off to 23% cents and in little demand. Victoria and Joe Bowers with published reports of strikes behind them, sdvanced the former to \$2.25 in the morning and the latter sold during the day at 2 cents a share.

Lower Mammoth, which also had tidings of a strike, did not respond with a raise but sold 200 around 12 cents. Daly sold at \$2.6% on buying orders from Park City. Daly Judge fell off a little while New York eold as high as 24% cents during the day.

ing the day.
The total number of shares sold was 31,740, for which was received \$346.25.

This is an increase in net imports of 22,700 tons, as compared with 1943. The increase in imports of fine copper from the United States was almost exactly 22,-

the United States was almost exactly 22,-760 tons. A significant fact.

The Butte (Moniana) district is now producing about 14,690 tons of copper ore a day. Of this amount the Amalgamated Copper company produces about 10,000 tons.—Mining Reporter.

FINDS COAL IN NEVADA.

Salt Laker Opens Up First Body Ever Found in State.

W. D. Higginbotham, a mining man, well known in this city, and who is now connected with the White Rocks Placer connected with the White Rocks Placer company, operating near Reno, Nev., is developing a promising coal prospect near Eiko, Nev. Interest is lent to this announcement because of the fact that this is supposed to be the only large coal body ever opened up in Nevada, a State which, while prolific in other minerals, seemed hitherto to be entirely lacking in coal.

DEVELOPING DISTRICT.

Force of Men Working on Promising Deer Valley Claims.

Development work on the claims of the Aristocrat Mining company at Park City Aristocrat Mining company at Park City has been resumed. The claims of the company lie east of Cerona in Deer valley. Assays have shown encouraging values and there is a fifty-foot timbered shaft on the property. A small force of men is at work and Manager John Hasson is hopeful of striking pay ore in the near future.

Boston Copper Market. Special to The Tribune.

BOSTON, Dec 12.—The Boston stock market, at the opening today, showed weakness, coppers running off immediately from 7s to 3 points from last night's closing. Greene Consolidated went off 3 points to 22, but recovered 1 point on later sales. Amalgamated soid at 61, off 5s from last night. The opening sales of Copper Range were at 65, a decline of 1 point. Trading was active at the very beginning and feverish. A determined attempt to check the bearish tendency became manifest at the outset. As a result the market steadied perceptibly all around. Greene Consolidated recovered 2 more points and sold at 25.

Ore and Bullion Settlements.

Ore and buillon settlements for yester-day amounted to \$176,590. As reported by McCornick & Co., they were as follows: American buillon, \$114,790; gold, affiver and lead ores, \$81,890. In the metal murket silver continued its rise and was quoted at \$9% cents an ounce; copper, 19% cents per pound; lead, \$4.69 per hundred pounds.

DEPARTMENT OF MINES.

Congress Should Provide for Its Organization.

The effort of Colorado mining men to induce Congress to provide for the organization of a department of mines and

ization of a department of mines and mining, the chief of which would be a member of the Cobinet, will be indorsed by mining men in all parts of the Union, says the Denver Republican.

It is not metalliferous mining alone that would be placed under the administration of the proposed department. Coal mining, oil and sait production, and the stone industry would be embraced. This would cause the department to include more or less important industries in nearly every State in the Union.

The value of the mining industry in its manifold forms is 50 great that it should not be entrusted to a mere bureau. It is one of the great sources of wealth to the whole country; and so far as the National Government has anything to do with stimulating the development of our natural re-

Government has anything to do with attra-ulating the development of our natural re-sources, it should not fall to recognize the importance of mining.

There is need of improvement in the mining laws applicable to mineral devel-opment on land now belonging to the Na-tional Government, suggestions concern-ing which could be made by the chief of the department of mines and mining. There should also be a center from which information concerning mining laws and

publications.
If the work of the geological survey should be placed under the new department it would relieve the Department of the Interior to that extent, enabling it is give attention to other matters belonging more directly to its administrative province.

Mining Notes.

The Grand Central declares the usual

The Pioneer sampler yesterday received four cars from Tintic, two from Nevada and one from American Fork.

John Bogan has started a force of men to work on the Rhemini, located cast of Farmington A considerable tonnage of low-grade ore has been opened up.

Taylor & Brunton sampler receipts amounted to twelve cars of ore from Fintle, three from Nevada. one from Flugham and one from Fish Springs.

Silver scored another advance yesterday, being quoted at 60% cents an ounce. The rise is due to heavy shipments to the Orient, and will probably continue until the first of the year.

The symptomic atribe, recently made on

The seven-foot strike, recently made on the 1100-foot level in the Dalton & Lark of the Elingham Con., shows 9 per cent copper, 30 ounces of silver and gold values. The daily average shipment from this ground and the Commercial group is about 45 tons. Tons, 65,000 308,000 72,000

about 45 tons.

The property of the Dakota Mining company, consisting of four claims on the west slope of Rising Sun mountain in the Tintle mining district, will be sold at sheriff's sales December 17, at Nephi In addition to the claims, equipment used in development, will also be sold.

The Mammoth reported on the market yesterday with three lots of dividend-paying ore. The first lot runs \$10 gold, 12.1 ounces silver, and 13.2 per cent copper; the second 36 gold, 15.6 ounces silver, and 4.9 per cent copper, and the third \$1.50 gold, \$5.5 cunces silver and 2.1 per cent copper.

A rich strike is reported on the 600-

A rich strike is reported on the 600foot level of the Lower Mammoth at Tintic. Manager Sydney Hamberger states
that about one foot of are has been encountered, running about 75 ounces to the
ton, and 10 per cent copper, with some
grid. Drifting on the big bodies of lowgrade ore blocked out on the 1300-foot
foot by the state of the st rade ore blocked out on the 1390-for
